

# FT5000

FT5000

For years, the ATM industry has trusted Triton for innovative technology that's practical and cost efficient, and Triton has delivered again with the FT5000, a versatile through-the-wall ATM that offers high performance for a surprisingly low investment.

*A high volume, reliable through-the-wall ATM you can afford.*

Our long-time experience in producing innovative, high quality cash dispensing machines has led us to develop this product focused on the financial institution market. The embedded PC-based FT5000 includes Encrypting PIN Pad (EPP), rear access, and full ADA and Triple DES compliance. Planned enhancements include support for XFS, emulation, and a variety of communication protocols.

But what makes the Triton FT5000 most popular with banks and credit unions is its highly cost-efficient operation. Financial institutions can place a drive-up or a walk-up configuration with two to four cassettes based on transaction volumes. You can count on the reliable operation that has made Triton a leader in the industry. Plus, the Microsoft® Windows® CE.NET operating system makes possible a long list of revenue generating value-added services.

Performance. Reliability. Easy and inexpensive to service. Thanks to Triton, there's finally a through-the-wall unit made just for you.

# FT5000 IN DETAIL

A high volume, reliable through-the-wall ATM you can afford.
