For many high-traffic locations, there has simply never been a cost-effective way to provide customers with access to a 24-hour walk-up ATM. Most of the big, traditional ATMs are too costly and complicated to even consider. The extremely reliable and affordable RT2000 gives merchants a low-cost, easy to service alternative to more expensive through-the-wall ATMs.

Finally, get more out of your high-traffic location with a cost efficient, 24-hour, through-the-wall ATM.

It’s no surprise this innovation comes from Triton. Triton customers know that our hallmark affordability is the result of decades of engineering and innovation. The RT2000’s high-performance is partly due to the Triton custom-engineered dispensing mechanisms. Triton’s self-calibrating dispenser mechanisms are designed to dispense 250,000 notes with no preventive maintenance.

The Triton RT2000 is easy to install. It’s easy to maintain. And most of all, its low cost and reliability means your high-traffic ATM location can finally become a high-profit ATM location. Finally, a through-the-wall ATM built by the experts in retail ATMs.
A cost-efficient, 24-hour through-the-wall ATM designed with the merchant in mind.
